

### [Arlington County Emergency Operations Support, Arlington County, Virginia](#)

ATCS was selected to provide ICS/NIMS trained personnel to staff the EOC supporting the command and general staff in the areas of operations, planning, logistics and administration/finance during a protracted emergency event. Under the direction of County staff, ATCS prepared damage assessments, situation reports, incident action plans, and other documents in support of EOC operations.

ATCS personnel would be embedded with OEM staff and function as an integral part of the EOC staffing, but decision making authority would remain with the County OEM staff.

ATCS will provide technical and operational expertise specifically focused in the areas of EOC operations as requested by the OEM Director, to include subject matter experts specifically focused in the areas of emergency and disaster management, incident command, NIMS, emergency response, and debris removal.
