

[Construction Engineering Inspection Services for Salem District-Wide Contract II](#)

ATCS, PLC was selected by the Virginia Department of Transportation's Salem District to provide construction and maintenance inspection services, design-build oversight and supplemental engineering services.

The Salem District, located in southwestern Virginia, is comprised of 12 counties, including mountainous terrain interspersed with rural and urban settings. This area is also a host to many colleges and universities, including the Virginia Polytechnic Institute.

Construction inspection services include new roadways, bridges and intersection improvements. Maintenance inspection includes guardrail, drainage improvements, milling and paving, and pavement markings on interstate, primary, and secondary routes.

Supplemental engineering services include shop drawing review, CPM scheduling, claims assistance and FHWA compliance reviews.

This contract is valued at 2 million/year, from October 2009 through October 2012.
