

[Dulles Corridor Metrorail Extension](#)

The \$1.5 Billion project is a new 23-mile rail line, extending service from the existing Orange Link at the East Falls Church Station in Arlington County to Route 722/Ryan Road in Loudoun County. Currently, Phase 1 of the project is under construction. Phase 1, scheduled for completion in July 2013, will extend service through five new stations – four in Tysons Corner, and one at Wiehle Avenue on the eastern edge of Reston.

ATCS is providing construction management and quality assurance inspectors overseeing the construction work in the field within the VDOT right-of-way. Our construction staff coordinates with the design-build contractor, WMATA, MWA and VDOT to ensure that the design-build contractor is performing in accordance with their construction quality control plan and within VDOT specifications. In addition, we are overseeing the design submittal process and the Land Use Permit application process.
