

[Piedmont professional Center, Town of Warrenton, Virginia](#)

Project Responsibilities: Manage project from boundary and topographic surveys to engineering of site grading, erosion & sediment control, storm and sanitary sewer, waterline, S.W.M. and site layout.

Piedmont Professional Center is a 3-story 32,000 SF medical office building. The use of retaining walls was required for the conventional SWM pond design. The building is heated and cooled using geothermal technology. There are over 30 well drilled on the approx. 4.5 acre site to support the geothermal system. Fauquier Hospital now occupies a portion of the building.
